

Read me first

Set up your own copy in about 15 minutes with Claude Cowork — no coding.

DO THIS, IN ORDER

- 1 Unzip this download.**
Extract the .zip to a real folder on your computer — don't work inside the zip preview window.
- 2 Open Claude Cowork.**
The desktop app — switch into Cowork mode.
- 3 Give Cowork access to this folder.**
Point it at the folder where you just unzipped these files, so Claude can read them.
- 4 Paste the prompt below and send it.**

COPY THIS PROMPT

I just downloaded the Founders Finance Group Sales Compensation Modeler and gave you access to this folder. Please: (1) read README.md, CLAUDE.md, and HANDOFF.md so you understand the project; (2) walk me through creating a free Supabase project and tell me exactly where to find my keys; (3) set up my environment file and run the database migrations with me; (4) make me the admin — my email is [your email]; (5) deploy it to Netlify as my own site and confirm the live URL works; (6) then show me how to log in and create my first scenario. Keep me out of the weeds — run what you can yourself, and pause only when you need a decision or a key from me.

- 5 Follow along.**
Claude reads the included guides and walks you through a free Supabase project and a Netlify deploy, pausing whenever it needs a decision or a key from you.

WHAT'S IN THIS KIT

README.md — what it is · **CLAUDE.md & HANDOFF.md** — technical reference Claude reads · **SETUP-WITH-CLAUDE.md** — full setup detail · **/src**, migrations, and config — the app itself. You don't need to open these — Claude does.
